Directions (91 to 95): *Read the following passage carefully and answer the questions that follow:*

The effort to derive educational objectives from studies of contemporary life largely grew out of the difficulty of managing an increased body of knowledge which developed after the advent of Industrial Revolution and kept on accelerating with each generation. One argument that contemporary life is so complex and changing we need to focus

educational efforts upon the critical aspects of this in view of the non-significance of the knowledge important fifty years ago. The second argument of study grows out of the findings relating to the transfer of training which views the educational objectives need to develop the several faculties of the mind and as life developed the student would be able to use this trained mind to meet the conditions that he encountered. The learner used the life situations and learning situations similarity to its advantage and better placed in its application outside training situation. It should be clear that a satisfactory formulation of objectives which indicates the behavioural aspects and the content aspects provides clear specification to indicate just what the educational job is.

Directions (96 to 100): *Read the given passage carefully and answer the questions that follow*

Though principles of participatory planning and decentralization have become *de rigueur* it may be necessary to take them further than is customary, so as to ensure that flexibility which is a hallmark of a relevant programme for adults is retained. Another existing premise that may require unlearning is the clubbing together of basic education for adults and children, not only because the learning patterns of adults are distinct from those of children, but also because their needs and priorities are an expression of the array of experiences that constitute each individual history and resultant aspiration. None of these come cheap. In addition, what emerges from the analysis is that there is a range of trained professionals required to see the job through. That there is an often non-existent pool of talent or is not adequately appreciated and therefore bound to have a short shelf-life is one half of the problem; the other is that the encouragement and facilitation required to build this resource requires an effort not just to promote basic and primary education but also to focus on broader issues of development. This is most imperative in relation to women's literacy and education; as long as women continue to lack social, political and personal rights, they will not benefit much from any literacy intervention; moreover, the prevailing inequalities will most likely be reinforced systematically through the systems and the people within them that design and implement programmes; finally, there will be a conspicuous absence of inspiring female role models, which will make the path to empowerment that much steeper.

96. As per the text 'Broader issues' includes
- A. Basic Education
- B. Primary Education
- C. Basic Education and Primary Education
- D. Basic and Primary Education along with a focus on issues of development

97. As per the text, what is the hallmark of a relevant programme for adults?

D. Authenticity

98. As per the text, which of the following is the correct statement about adult learning?
A. It is similar to basic education of children
B. Needs and priorities of adults and children are same
C. Needs and priorities of adults are different from children
D. Experience cannot be the criteria of distinguishing children from adults

99. The phrase *de rigueur* means
A. The principle is not accepted
B. The principle is accepted through force
C. The principle is required
D. The principle is not required

100. Which of the following correctly depicts the difficulty in the empowerment of women?
A. There is a systematic perpetuation of inequalities
B. Social rights are taken care of
C. Political rights have no role
D. Personal rights are extraneous factors
